### Staging Area Color Key:

Color:	Designation:	Staging Notes:
	Main Floor, (CS)	These scenes take place in a centralized location on the main floor of the stage. They will involve the full-cast, so this area will require a decent amount of spacing.
	Platform A, (USR)	This area is used to play scenes involving mainly our antagonists. In order to give a looming/powerful effect, I believe it should be the tallest platform. It needs to be large enough to accommodate a desk/board room table, room for 6-10 people, and an equal number of chairs.
	Main Floor, (DSL/MSL or DSR/MSR)	This area is primarily used for the brief scene-change scenes. As such, it should be positioned in an extreme corner(s) of the stage. The idea is to draw focus as far away from the areas being changed out for the next scene as possible.
	Platform B, (USC to USL)	This platform's furniture remains constant throughout the show. It represents the parlor in Grace's childhood home.
	Platform C, (DSL)	This platform is the most heavily used space in the show. Its furniture changes constantly.
